

HR MASTERDATA - A PLATFORM FOR MAKING THE RIGHT DECISIONS

Are you in control of your HR master data?

Many companies find it difficult to keep employee information up to date and that reports and analyses for making important decisions are hard to find.

Does this sound familiar?

- Employee information is not updated
- HR needs to update the same data in multiple systems
- Statistics and analyses are hard to find
- Inducting new employees is a work-intensive process

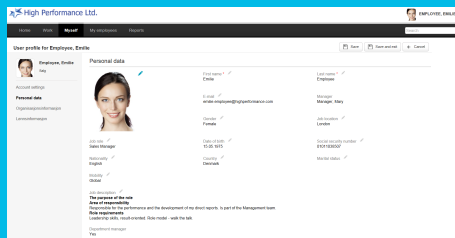

CatalystOne™ HR Masterdata

Maintenance of HR master data is made easy through self-service and a user-friendly interface. With reliable information, you have a solid platform for making the right decisions.

The foundation of strategic HR

With CatalystOne™ HR Masterdata, you get a framework for important information in reports and analyses, which is essential for achieving goals and making decisions.

Our solution is simple and inexpensive to use and operate – and you can implement it in no time.

The solution's key qualities and advantages include:

How your organisation can benefit from CatalystOne™ HR Masterdata

FOR HR

HR master data always up to date

Create reports, with up-to-date information about employees.

Useful reports

Create reports using any number of criteria, such as gender and age distribution, seniority, employee turnover, salary overviews, etc.

Important events

Email notifications help you keep track of important events such as birthdays, important dates, anniversaries or probationary periods.

Preserve historical data

For example, you can use historical data to follow salary trends over time.

FOR THE ORGANISATION

Good start for new employees

Help new employees quickly get accustomed to their new role with predefined check lists of follow-up activities for everyone involved (employee, manager, HR, etc.)

Automatic organisational structure

Easy to maintain roles, positions and organization.

Simple integration with existing HR systems

The built-in interface facilitates simple and flexible integration with a variety of systems via CSV, active directory or web services.

Inexpensive to use and maintain

Our solution is far less expensive than similar solutions from ERP vendors.
